PROFESSIONAL EXPERIENCE

Juspay Technologies Private Limited,

Jun 2023 – present

Product Engineer -1 🔗

- Developed a **web service** enabling developers and merchant teams to create and debug pages for multiple clients in a centralized platform, **reducing merchant production go-live time by 40%**.
- Implemented a new UI experience tailored for **high-value** merchants, including **Indigo and Air India**, to support their global service launches. This initiative **enhanced success rates** and significantly increased user engagement and intent on their platforms by **over 80%**.
- Led the complete redesign and revamp of the Offer PP product's **front-end architecture** at Juspay, transforming the user experience and optimizing performance. This strategic overhaul resulted in a remarkable **increase of over 60%** in merchant success rates (SRs) and significantly boosted user intent, reinforcing the platform's value for **merchants and end-users alike**.

EDUCATION

VidyaVardhaka College of Engineering, VTU, Bachelor of

2019 – 2023

Engineering in Electronics and Communication

Engineering 🔗

PROJECTS

Youtube Clone 🔗

- Designed the landing page of a YouTube clone using ReactJS, CSS, and Material-UI, showcasing attention to detail and proficiency in modern front-end technologies. Deployed the application using Firebase, highlighting seamless integration and hosting capabilities.

REAL TIME CHAT APP 🔗

- Developed a dynamic real-time chat application from the ground up using ReactJS, React-Bootstrap, and Socket.io, enabling seamless, instantaneous communication. The app delivers a polished, responsive user interface and robust real-time messaging capabilities, showcasing cutting-edge web technologies and providing a smooth, engaging experience for users.
